

 Democratizing city data

Everyone Deserves Transparent Government

From public safety to city services, Transparent.city turns official city data into clear, source-linked summaries of what's actually changing in your neighborhood. See where things are improving, where they aren't, and have the receipts to credit or challenge your public officials fairly.

The image shows a smartphone screen displaying the Transparent.city app interface. The app shows a dashboard for San Francisco (SF) with a 'Subscribe' button. The user is logged in as Mayor Daniel Lurie. The dashboard displays a table of crime and safety data for 2024 and 2025, with a 'Change' column. The data is categorized into 'CRIME' and 'SAFETY'.

Year	Month	2024 YTD - '24	2025 YTD - '25	Change
